What were the main strengths of this instructor?

Comments
Notes were very clear, assignments were great, everything was easy to understand, great teacher overall
Building relationships with students. Being transparent about the assignments and what is expected of us. She gives amazing feedback after our performances that actually are relevant and useful. She is a GREAT teacher and should stay at NIU.
Explains everything very well and always asks for questions after a lesson for clarifications. Also always have good feedback to improve upon then next lesson.
They were ready to help out any students who were struggling
The strengths of this instructor were that she thoroughly explained each practical, checked for understanding, and had us see first hand as to how the practical was going to go as well as to show what was expected from the students behalf.
Her main strengths were making expectations very clear, especially when it came to our practicals. I really liked how she did a mock practical so we could see what was expected. That was really helpful!
Dr Ison clearly and effectively instructed the class through lessons and practicals. Her expectations were always clear and she gave full and appropriate feedback after every exercise.
Ison is the best professor ive ever had. The way she organizes her teaching is something I believe every teacher should strive to be like. She sets her students up for success not only in the classroom, but her blackboard is one of the best resources from a teacher ive every had. And her ability to engage with us students and her willingness to work with our schedules when assignments roll around. I will say that out of this entire semester i believe Ison helped me grow towards my goal of being a pe teacher far more than any other teacher ive had.
Worked well with students to make sure that they are in the clear and understand the information provided in class.
Communication
Very welcoming and is able to get the whole class involved.
Dr. Ison is very organized and makes her expectations very clear. She also treats every student with respect and makes sure that we all feel comfortable in her classroom. She is an amazing teacher.
The teacher went through all the material clearly and she served as a resource to make sure what needs to be learned.

What suggestions would you make for the improvement of this course?

Comments
None
None.
Many of the teaching guidelines were strict, but I understand why it was like that.

I would suggest more practice for our practicals. In the beginning of the semester, we would practice them in groups but that died off.
Only thing I have to say about improvement is that it just gets a tad bit hot in the gym we use for class, but thats all I think needs improvement!
I do not have many suggestions for anything different. I think maybe somethings that could be done differently could be the way that practical's were done. I feel as if on some of the days we did not have enough time to get everyone done within one day.
More optional work to strengthen a student's weaknesses
Trying to be able to do more situations that a Physical Educator would come across on a day-to-day basis.
